KyRON Receives "Most Innovative Use of Technology" Award from Government Technology Magazine

Government Technology Magazine recently awarded the Kentucky Regional Optical Network (KyRON)'s Internet2 Initiative the "Most Innovative Use of Technology" at the magazine's Kentucky Digital Government Summit event held on April 22nd in Lexington, Ky. KyRON, an Internet2 Network Member and Connector, was recognized for its innovative use of technology to provide Kentucky students and teachers a rich, interactive learning environment with access to the most advanced content and resources via advanced networking. In doing so, the Initiative has helped to engage and stimulate students in new ways and most importantly helped better prepare them for the 21st century's global economy.
